

## **Year 11 Support Package 2018/19 – Science**

Below is a list of some of the initiatives and support packages that will be available to all Year 11 students in 2018/19;

### **In school support:**

- Form time support on key topics & skills – with Mr Hawe
- In class one to one support & mentoring - various Science staff
- After school study package (guided or self-directed study) – various Science staff, schedule TBC

### **Out of school support:**

- Educake – Online assessment tool, to be used for homework, and self-set revision questioning, all monitored by Science teachers. All students already have accounts.
- GCSEpod – See above. All students already have accounts.
- Kerboodle – coming soon. Online resource to complement in class teaching. Access to online, electronic textbook, practice questions, tests, and practical materials used in and to support lessons.
- PiXL Resources – A full suite of resources are available on Sharepoint. Every unit in both Combined Science and Triple Science is available.
- Revision guides & Workbooks – available to purchase for both Triple and Combined Sciences, providing both easy to digest content and practice assessment material.

Science will also be taking part in the PiXL wave initiative this year, where student's mock exams will be analysed in detail by PiXL. This will result in the production of a bespoke support/revision/therapy package being developed for each student, based on their individual needs. This process will be split into 2 phases; the first being conducted in Oct/Nov as part of Year 11 mock exams, and the second later in the year, around February.
